

Setup in Just 3 Minutes (1-2-3 Steps)

Traditional queue systems can take days to set up and install, whereas the Qwaiting QMS can be set up and used within three minutes. You can simply visit the official website **Qwaiting.com** to complete all of the necessary setup processes in a matter of minutes. You can also change, update, or remove all settings at any time and from any location after the initial setup. There will be no more high-priced site visits, maintenance, or repairs.

Setup Steps in 1-2-3:

1. Create Service

The first step is to make a Service. After you've created the service, go to Edit each service to see more options and functions.

2. Create Counter

The second step is creating a Counter Staff Login who will be in charge of calling the queue.

3. Settings

Third stage is to make a few key adjustments. Select the Logo URL and Footnote as the two most significant options, and the rest can be changed afterward.

Now that you've finished, it's time to test.

a. Visit the Links Page and select the Web Kiosk Link to try to get a Queue Ticket.

b. Turn on one of the televisions. a link to the test

b. Try to Call Queue after logging out as Admin and then back in as Counter Staff, and you'll hear the TV Page call.
